

P.U.(A) 328/86
FACTORIES AND MACHINERY (BUILDING OPERATIONS AND WORKS OF ENGINEERING
CONSTRUCTION) (SAFETY) REGULATIONS 1986
PART XI - DEMOLITION

Regulation 100. Preparation.

Before commencing any demolition work all glass in exterior operatings shall be removed. All gas, electric, water , steam and other supply lines shall be shut off and capped. In each case, the relevant authorities involved shall be notified in advance. Where it is necessary to maintain any power, water, gas or electric lines during demolition such lines shall be so re-located or protected with substantial covering so as to protect them from damage and to afford safety to the employees.
