- Appendix 6 : Summary Report Format For Testing and Examination of An Engineering Control Equipment Conducted By A Hygiene Technician
- Appendix 7 : Summary Report Format For Medical Surveillance Conducted By An Occupational Health Doctor
- Appendix 8 : Activities or occupations where persons employed therein must undergo medical surveillance conducted by an occupational health doctor
- Appendix 9 : Sample Certificate of Registration

PREFACE

These guidelines may be cited as the *Guidelines for the Registration of Assessor, Hygiene Technician and Occupational Health Doctor* (hereinafter referred to as “the guidelines”)

The purpose of the guidelines is to lay down the qualifications for, the duties of and the procedure for registration of an assessor, a hygiene technician and an occupational health doctor in pursuance to the requirements of the Occupational Safety and Health (Use and Standard of Exposure of Chemicals Hazardous to Health) Regulations 2000 [P.U. (A) 131]

The guidelines will be used as the reference for applicants to be registered with the Director General of Occupational Safety and Health either as an assessor, a hygiene technician or an Occupational Health Doctor.

To keep it up to date, it will be reviewed from time to time.

I would like to thank the staffs of the Division of Industrial Health for their effort in the preparation and publication of these guidelines.

**Director General
Department of Occupational Safety and Health
Malaysia**

December 2000

1. GENERAL

1.1 The purpose of these guidelines is to stipulate the qualifications for, the duties of and the procedure for the registration of

- a) an **Assessor**;
- b) a **Hygiene Technician**; and
- c) an **Occupational Health Doctor**.

in pursuance to the requirements of the Occupational Safety and Health (Use and Standard of Exposure to Chemicals Hazardous to Health) Regulations, 2000 (hereinafter referred to as "the Regulations").

1.2 The Director General of Occupational Safety and Health (hereinafter referred to as "the Director General") will maintain registers of the Assessor, Hygiene Technician, and Occupational Health Doctor.

1.3 For the purpose of these guidelines: -

"an Assessor" means an employee or any other person appointed by the employer and registered with the Director General to carry out assessment of risk to health arising from the use of chemicals at work as required by Part IV of the Regulations;

"a Hygiene Technician" means an employee or any other person appointed by the employer and registered with the Director General to carry out chemical exposure monitoring or to carry out any inspection, examination or test on engineering control equipment installed in a place of work;

"an Occupational Health Doctor" means a medical practitioner who is registered with the Director General to conduct medical surveillance of employees";

"a medical practitioner" means a person registered under the Medical Act 1971 and possessing a current Annual Practising Certificate;

"DOSH" means the Department of Occupational Safety and Health, Malaysia;

"medical surveillance" means the monitoring of workers for the purpose of identifying changes in health status due to occupational exposure to health hazards at the place of work;

"NIOSH" means the Malaysian National Institute of Occupational Safety and Health;

“practice in occupational safety and health means the main job function or responsibility relates to matters pertaining to occupational safety and health (mere membership of a safety and health committee should not be construed as having fulfilled this description) ; and

“the Act” means the Occupational Safety and Health Act 1994 (Act 514).

2. QUALIFICATIONS AND TRAINING

2.1. General

Any person wishing to be registered, as an Assessor or a Hygiene Technician or an Occupational Health Doctor must fulfil the following requirements:

- a) be a Malaysian citizen; or if a foreign resident, must hold a valid Malaysian working permit;
- b) must not be less than twenty-one (21) years of age at the time of submitting application;
- c) is a healthy person of good character;
- d) has not been found guilty for any act or omission which amounts to professional negligence as a professional engineer or a medical practitioner;
- e) has not been convicted of an offence under the Act or regulations made there under; and
- f) has not been convicted of an offence under any law and sentenced to more than one year imprisonment or a fine of more than two thousand Malaysian ringgit.

2.2. Assessor

A person applying to be registered with the Director General as an Assessor, in addition to the requirements of paragraph 2.1 above, must at least: -

- a) a *certified industrial hygienist* as recognised by the American Board of Industrial Hygiene or by any other accredited certification body recognised by DOSH;

OR

- b) (i) possess a *degree or postgraduate diploma* in occupational safety and health; occupational safety; occupational health; or industrial/occupational hygiene recognised* by the Government of Malaysia;

- (ii) has a minimum of one (1) year practice in occupational safety and health; and
 - (iii) has conducted a chemical health risk assessment **or** has successfully attended the course for assessor on chemical health risk assessment conducted by NIOSH or by any training provider recognised by DOSH
- OR
- c) (i) possess a *degree* in medicine, engineering, physics, chemistry, biochemistry, ergonomics or natural and applied sciences, recognised* by the Government of Malaysia; and
 - (ii) has a minimum of three (3) years practice in occupational safety and health; and
 - (iii) has conducted a chemical health risk assessment **or** has successfully attended the course for assessor on chemical health risk assessment conducted by NIOSH or by any training provider recognised by DOSH;
- OR
- d) (i) possess a *diploma* in engineering, physics, chemistry, biochemistry, ergonomics or natural and applied sciences recognised* by the Government of Malaysia; and
 - (ii) has a minimum of five (5) years practice in occupational safety and health;
 - (iii) has conducted a chemical health risk assessment **or** has successfully attended the course for assessor on chemical health risk assessment conducted by NIOSH or by any training provider recognised by DOSH;
- OR
- e) (i) possess the *Higher School Certificate / Sijil Tinggi Persekolahan Malaysia (STPM)* , a *Polytechnic certificate* or equivalent with at least a credit in chemistry at the Malaysian Certificate of Education (MCE) / the Sijil Persekolahan Malaysia (SPM) level;
 - (ii) has a minimum of seven (7) years practice in occupational safety and health;
 - (iii) has successfully attended the course for assessor on chemical health risk assessment conducted by NIOSH or by any training provider recognised by DOSH; and
 - (iv) has passed the examination for assessors conducted by NIOSH.

OR

- f) (i) a registered safety and health officer;
- (ii) has a minimum of ten (10) years practice in occupational safety and health;
- (iii) has successfully attended the course for assessor on chemical health risk assessment conducted by NIOSH or by any training provider recognised by DOSH; and
- (iv) has passed the examination for assessors conducted by NIOSH.

* However for those with qualifications not recognised by the Government of Malaysia they may be registered on condition that they, in addition to the respective conditions under paragraphs b), c) or d) had passed the examination for assessor conducted by NIOSH.

2.3 Hygiene Technician

A person applying to be registered with the Director General as a Hygiene Technician, in addition to the requirements of paragraph 2.1 above, must: -

- a) possess at least a diploma in occupational or industrial hygiene recognised by the Government of Malaysia;

OR

- b) (i) possess a valid DOSH certificate of competency in the monitoring of mineral dust exposure (i.e. approved as a Competent Person under the Factories and Machinery (Mineral Dust) Regulations 1989); and
- (ii) possess a valid DOSH certificate for competency in the inspection, examination and testing of local exhaust ventilation system (i.e. approved as a Competent Person under the Factories and Machinery (Asbestos Process) Regulations 1986 or the Factories and Machinery (Mineral Dust) Regulations 1989 to conduct inspection, examination and testing of local exhaust ventilation system)

OR

- c) (i) possess a valid DOSH certificate of competency in the monitoring of mineral dust exposure **or** a valid certificate for competency in the inspection, examination and testing of local exhaust ventilation system*; and
- (ii) has passed the examination for hygiene technician conducted by NIOSH.

OR

- d) (i) possess the Sijil Pelajaran Malaysia (SPM) with at least credits in science subjects and mathematics;
- (ii) at least one (1) year practice in occupational safety and health ;
- (iii) has attended a course for hygiene technician conducted by NIOSH or any training provider recognised by DOSH; and
- (iv) has passed the examination for hygiene technician conducted by NIOSH.

* A competent person who does not possess the two competencies will not be registered as a Hygiene Technician but the Director General may allow him to carry out his duty as a Hygiene Technician for the respective competencies for a period of not more than one year.

2.4 Occupational Health Doctor

A person applying to be registered with the Director General to conduct medical surveillance must be a **medical practitioner** registered with Malaysian Medical Council and:-

- a) possess at least a postgraduate diploma in occupational health or occupational medicine recognised by the Government of Malaysia or by the Director General;

OR

- c) has successfully completed the occupational health doctor training course approved by the Director General and has passed the occupational health doctor examination conducted by NIOSH.

3. REGISTRATION PROCEDURE

3.1 An application to be registered with the Director General must be made and completed in the form set out in *Appendices 1, 2, 3* for an Assessor, a Hygiene Technician, and an Occupational Health Doctor, respectively, and shall be forwarded to him together with the following items :-

- a) a certified true copy of academic or professional qualifications;
- b) a certified true copy of the National Registration Identity Card (for Malaysian citizen) or Passport (for foreign resident);
- c) a certified true copy of work permit issued by the Malaysian Government (only for foreign resident);
- d) details of working experience in occupational safety and health practice including the name of supervisor(s) & his qualifications;

- e) details of chemical health risk assessment or monitoring of chemical exposure or testing of local exhaust ventilation system / engineering control equipment or medical surveillance that have been conducted;
- f) a certified true copy of the certificate of attendance of relevant courses; and
- g) a certified true copy of the results of relevant course examination.

3.2 The completed application shall be forwarded to: -

The Director General
Department of Occupational Safety and Health,
Aras 2, 3 & 4, Blok D3, Parcel D,
Pusat Pentadbiran Kerajaan Persekutuan,
62502 Putrajaya

3.3 The prospective applicant may be asked to attend an interview or present the finding of an assessment he had conducted, if necessary.

3.4 Successful applicants will be registered for a maximum period of three (3) years. The Director General may, however, prescribe a shorter duration. Notwithstanding, the Director General may revoke the registration of any person before its expiration date in accordance with the provisions of paragraph 6.

4. PROCEDURE FOR RENEWAL OF REGISTRATION

4.1 A person applying to renew registration with the Director General must: -

- a) Show proof that he had been engaged in work activities of an Assessor, Hygiene Technician or Occupational Health Doctor (whichever is relevant) every year; and
- b) Have undergone continuing education in the field of occupational safety and health or occupational medicine.

4.2 Application for renewal of registration must be made at least three (3) months before the expiration date of the current registration, by completing the form set out in *Appendix 4*.

5. DUTIES OF ASSESSOR, HYGIENE TECHNICIAN AND OCCUPATIONAL HEALTH DOCTOR

5.1 Assessor

The Assessor is expected to: -

- a) Carry out assessment of health risks arising from the use of chemicals hazardous to health at the workplace;

- b) Furnish a report of the assessment to the employer of a place of work appointing him as the registered assessor within one month of the completion of the assessment;
- c) Without any delay inform the respective employer of the immediate danger discovered during the assessment process;
- d) Make recommendations on the necessity to:
 - i) make changes or institute a programme to control the risks;
 - ii) control any accidental emission of a chemical hazardous to health as a result of leakage, spillage, or process or equipment failure;
 - iii) carry out a health surveillance programme;
 - iv) conduct exposure monitoring; and
 - v) institute a training programme for employees.
- e) Present his findings and recommendations to the employer upon completion of the report; and
- f) Submit, within thirty (30) days upon completion of the assessment, a summary to the Director of the nearest DOSH office and forward a copy to the Director General. The format of this summary is set out in *Appendix 5*.

5.2 Hygiene Technician

The Hygiene Technician is expected to: -

- a) Conduct employee exposure monitoring to chemicals hazardous to health as required by the Regulations;
- b) Conduct the inspection, examination and testing of local exhaust ventilation system and other engineering control equipment as required by the Regulations;
- c) Make recommendations to the employer, with respect to the findings, on the necessary improvements to be made to minimise the existing employee exposure or, in the case of an engineering control equipment, to improve the performance of the existing equipment;
- d) Furnish a report of the chemical monitoring or the inspection, examination and testing of an engineering control equipment to the employer of a place of work appointing him as the hygiene technician within one month of the completion of the work;
- e) Present his findings and recommendations to the employer upon completion of the monitoring or testing report;

- f) Submit, within thirty (30) days upon completion of the chemical exposure monitoring or inspection, testing and examination of engineering control equipment, a summary to the Director of the nearest DOSH office with a copy made for the Director General. This summary format is set out in *Appendix 6*.

5.3 Occupational Health Doctor

The Occupational Health Doctor is expected to: -

- (a) Conduct medical surveillance to persons exposed to chemicals listed in the schedule II to the Regulations. Refer to *Appendix 8*;
- (b) Assist employer in the setting up, implementation and evaluation of an occupational medical surveillance programme that includes
 - (i) Pre-employment and pre-placement medical examination;
 - (ii) Biological monitoring;
 - (iii) Health effects monitoring;
 - (iv) Investigation of occupational disease and poisoning cases including workplace inspection;
 - (v) Disability assessment including the ability to use personal protective equipment;
 - (vi) Return to work examination after medical removal protection;
 - (vii) Health education; and
 - (viii) Record keeping.
- (c) Notify any cases of occupational poisoning and diseases to the Director General of Occupational Safety and Health; and
- (d) Submit, within thirty (30) days upon completion of the medical surveillance, a summary to the Director of the nearest DOSH office with a copy made to the Director General. This summary format is set out in *Appendix 7*.

6. REFUSALS AND REVOCATION OF REGISTRATION

- 6.1 The Director General may refuse to register any person if he is not satisfied that the applicant fully meets the requirements outlined in paragraph 2 above.
- 6.2 The Director General may refuse to renew registration if the applicant:
 - a) has ceased practising occupational safety and health; or

- b) in the case of an Occupational Health Doctor, has ceased medical practice; or
 - c) has not met any requirements set by the Director General; or
 - d) has failed to conduct his duties as outlined in paragraph 5.
- 6.3 The Director General may revoke the registration of an assessor, a hygiene technician or an occupational health doctor : -
- a) if his registration was obtained by fraud or misrepresentation; or
 - b) if he has failed to discharge his duties as an assessor, a hygiene technician or an occupational health doctor outlined in paragraph 5; or
 - c) has been convicted of an offence under the Act or any regulations made there under; or
 - d) has ceased practising occupational safety and health; or
 - e) in the case of an Occupational Health Doctor, has ceased medical practice; or
 - f) has not met the requirements stipulated in these guidelines.

7. CERTIFICATE OF REGISTRATION

The certificates issued will be in the format set out in *Appendix 9*. Extensions of the certificates validity will be stamped at the back portion of the certificate.

Appendix 8

Schedule II of the OSH (USECHH) Regulations 2000: Chemicals for which medical surveillance is appropriate

1. 4- Aminodiphenyl
2. Arsenic and any of its compound
3. Asbestos (all forms except crocidolite)
4. Auramine, Magenta
5. Benzidine
6. Beryllium
7. Cadmium any of its compound
8. Carbon tetrachloride
9. Disulphur dichloride
10. Benzene including benzol
11. Carbon tetrachloride
12. Trichloroethylene
13. N-Hexane
14. Bis(choloromethyl) ether
15. Chromic acid
16. Chromium, metal and inorganic compounds. Chromates or dichromate of potassium, sodium, ammonium or zinc
17. Free crystalline silica
18. Isocyanates
19. Lead (including organic lead compounds)
20. Manganese
21. Mercury
22. Mineral oil including parafin
23. B-Naphthylamine
24. L-Naphthylamine and its salts
25. Orthotolidine and its salts
26. Dianisidine and its salts
27. Dichlorobenzidine and its salts
28. 4-Nitrodiphenyl
29. Nitro or amino derivatives of phenol and of benzene or its homologues
30. Nitrous fumes
31. Pesticides
32. Pitch
33. Tar, bitumen or creosote
34. Vinyl chloride monomer (VCM)
